*NEW Learning from Teaching
Evidence-Based Treatment of Cerebrovascular Disease
  - Antithrombotic Therapy in Secondary Prevention of Non-Cardioembolic Stroke
  - Antithrombotic therapy in the prevention of Cardioembolic stroke
  - Antithrombotic Treatment in Acute Ischemic Stroke
  - Approach to Medical Care of Acute Stroke
  - Approach to Stroke in the Young Adult
  - Carotid Atherosclerotic Disease
  - Diagnostic Testing in Cerebrovascular Disease
  - E.B. Practice: Thrombolysis in Acute Ischemic Stroke
  - Evidence-based Stroke Rehabilitation
  - Management of Intracerebral Hemorrhage
  - Management of Subarachnoid Hemorrhage
  - Pre-hospital and Emergency Mngt of Stroke Patient
  - Prevention & Treatment of Neurological Complications after Acute Ischemic Stroke
  - Principles of Evidence Based Medicine
  - Strategies for Secondary Ischemic Stroke Prevention

Allergy & Immunology
  - The Future of Allergy

Cardiology
  - Cardiac Toxicity of Cancer and Cancer Chemotherapy
  - Management of Ventricular Tachycardia in Patients with CHF
  - Patent Foramen Ovale and Atrial Septal Defects
  - Stroke and Atrial Fibrillation
  - Surgical Management of Atrial Fibrillation in Patients with Mitral Valve Disease

Endocrinology
  - Peri Operative Steroid Management in Patients Undergoing Pituitary Surgery

Gastroenterology
  - Endoscopic Management of Bariatric Surgical Complications
  - Management of C difficile infection in IBD Patients
  - Management of Difficult Esophageal Strictures
  - Management of Dysplasia
  - The Expanding Role of EUS in Pancreatic Cancer
  - Treatment of Hepatitis C in Special Populations
  - Update in Current Surgical Therapies for Obesity
  - Update on Non-alcoholic Liver Disease
  - When Should I Check Drug Levels

Hematology
  - Abnormalities in the CBC
  - Acquired Risk Factors for DVT/PE
  - Cancer Associated Thrombosis
  - Current Treatment of DVT/PE
  - Diagnosis and Treatment of Iron Deficiency
  - My Patient is Bleeding: What Do I Do?
  - Sickle Cell Disease
  - Thrombocytopenia in the Hospitalized Patient
  - Treatment of Venous Thromboembolism Using Newer Anticoagulants

Hospitalist
  - An Approach to the Poisoned Patient
  - Management of Acute Decompensated CHF
  - Managing Acute Kidney Injury
  - Managing Hospital-Acquired Pneumonia
  - Prevention and Treatment of Bloodstream Infections

Obstetrics & Gynecology
  - Monochorionic Twins: The Tale of the Shared Placenta
  - Surgery for the Infertile Patient with Dysmenorrhea
  - The Changing Face of Fertility Preservation

Oncology
  - Acute Myeloid Leukemia 2013
  - Chemotherapy Considerations and Complications
  - Definitive Chemoradiation is the Treatment of Choice for Stage III NSCLC
  - Evolving Strategies for Stage III NSCLC
  - Non-Hodgkin Lymphoma
  - Radiation Therapy for Functioning Pituitary Tumors
  - Role of Adjuvant Radiation Therapy

Pediatric-Stroke
  - Perinatal Stroke: Black boxes and brighter directions
  - Infection and Stroke in the Little Folk

Pediatrics – St. Louis Children’s Hospital Rounds
  - Anti-Hypertensive Drugs in Adults & Children
  - Anxiety Disorders in the Primary Care Office
  - Assessment and Treatment of Preschoolers with ADHD & Disruptive Behaviors
  - Birth Plans & Beyond: Helping Parents Make Good Decisions for their Newborn
  - Burns & Soft Tissue Wounds in Children
  - Cardiac MRI in Pediatrics
  - Community-Acquired Pneumonia in Children
  - Current Considerations in Pediatric Liver Disease
  - Early Intervention for Preschool Depression
